DATA SOURCES

Population

The total number of residents living in a specified location.

Source: U.S. Census Bureau

Labor Force

The total number of residents actively employed or seeking employment.

Source: U.S. Bureau of Labor Statistics

Employment

The number of residents currently employed in the labor force.

Source: U.S. Bureau of Labor Statistics

Unemployment

The total number of residents who are actively seeking employment but are currently without work.

Source: U.S. Bureau of Labor Statistics

Unemployment Rate

The percentage of the labor force that is unemployed.

Source: U.S. Bureau of Labor Statistics

Number of Occupied Housing Units

The number of housing units currently inhabited by residents.

Source: Clark County Department of Comprehensive Planning

Persons Per Household

Population estimates for each area are divided by the corresponding estimate for the number of occupied housing units in that area.

Source: U.S. Census Bureau; Clark County Department of Comprehensive Planning; Applied Analysis

Number of Vacant Housing Units

The difference between total housing units and occupied housing units represents the number of unoccupied housing units.

Source: Clark County Department of Comprehensive Planning; Applied Analysis

Housing Vacancy Rate

The housing vacancy rate represents the ratio of vacant housing units to the total housing units (occupied and vacant) within a given area.

Source: Clark County Department of Comprehensive Planning; Applied Analysis

Jobs Per Household

Employment estimates for each area are divided by the corresponding estimate of occupied housing units for that area. This reflects the residency of the employee (i.e., a Henderson resident working in unincorporated Clark County would be counted as a job in Henderson.)

Average Annual Wages - All Employment

Total annual wages for all industries are divided by the average of the twelve monthly employment levels.

Source: U.S. Bureau of Labor Statistics

Average Annual Wages - Manufacturing

Total annual wages for the manufacturing industry are divided by the average of the twelve monthly employment levels.

Source: U.S. Bureau of Labor Statistics

Median Income

The midpoint of each area's population income distribution, where half of the individuals or households earn above that amount and half earn below it.

Source: U.S. Census Bureau

Vehicles Available

The total number of vehicles available in each location. Values for the balance of Clark County are estimated based on a weighted average.

Source: U.S. Census Bureau

Estimated Vehicles Per Household

The estimated vehicles per household are calculated by dividing the total number of vehicles reported for each area by the corresponding number of households. Values for the balance of Clark County are estimated based on a weighted average.

Source: U.S. Census Bureau; Applied Analysis

Mean Travel Time to Work (Minutes)

The average time in minutes it takes for a worker to commute one way from home to a job, excluding those who work from home.

Source: U.S. Census Bureau

Percent Proficient - 3rd Grade Math

Location data is used to create a list of each area's schools and their individual 3rd-grade math proficiency rates. An average of these rates, weighted by the enrollment of each school, was calculated for each area.

Source: Nevada Department of Education; Applied Analysis

Percent Proficient - 3rd Grade Reading

Location data is used to create a list of each area's schools and their individual 3rd-grade reading proficiency rates. An average of these rates, weighted by the enrollment of each school, was calculated for each area.

Source: Nevada Department of Education; Applied Analysis

Percent Proficient - 8th Grade Math

Location data is used to create a list of each area's schools and their individual 8th-grade math proficiency rates. An average of these rates, weighted by the enrollment of each school, was calculated for each area.

Source: Nevada Department of Education; Applied Analysis

Percent Proficient - 8th Grade Reading

Location data is used to create a list of each area's schools and their individual 8th-grade reading proficiency rates. An average of these rates, weighted by the enrollment of each school, was calculated for each area.

Source: Nevada Department of Education; Applied Analysis

Graduation Rates

Location data is used to create a list of each area's schools and their individual graduation rates. An average of these rates, weighted by the enrollment of each school, was calculated for each area.

Source: Nevada Department of Education; Applied Analysis

Nevada Star Rating

Location data is used to create a list of each area's schools and their individual school index scores. An average of these scores, weighted by the enrollment of each school, was calculated for each area.

Source: Nevada Department of Education; Applied Analysis

Number of Elementary Schools

Location data is used to calculate the total number of elementary schools in each location.

Source: Nevada Department of Education; Applied Analysis

Number of High Schools

Location data is used to calculate the total number of high schools in each location.

Source: Nevada Department of Education; Applied Analysis

Number of Middle Schools

Location data is used to calculate the total number of middle schools in each location.

Source: Nevada Department of Education; Applied Analysis

Total Enrollment

Location data is used to calculate the total number of students enrolled at schools in each location. Certain special cases such as charter schools, adult education, juvenile detention education and others are excluded from the calculations.
